4. Task Force on Industrial Contracting and Industrial Security (AIUO)

STAT [REDACTED] The first major review of Agency contracting since [REDACTED] was carried out during the year by an internal interdirector task force. Four specific recommendations were made by the task force, with all approved except the move from dual delegation of procurement authority to single delegation. Implementation of these recommendations, plus additional direction from the DDCI, has been monitored by the OL/PMS. The major result of these actions has been stronger contract language on security, improved security manuals, and more unity of Agency procurement.

5. Procurement Notes (AIUO)

Major policy or procedural changes were implemented through issuance of 16 procurement notes.

6. CONIF (AIUO)

CONIF has gone on line with GAS and OF has begun payment of contracts based on CONIF generated information. This interface has required several additional edits and has resulted in a quantum improvement in the accuracy and completeness of the CONIF data base.

[REDACTED]

8. Federal Law (AIUO)

A substantial effort has been required to review and prepare positions on many legislative proposals covering a wide range of subjects, such as foreign corrupt practices, contract disputes, small business, Federal Acquisition Act, and our charter legislation.

5. GSA Scandal - (AIUO)

The largest scandal in the history of the U.S. Government procurement has hit GSA. The Agency librarian, at the request of OL/PMS, is clipping articles on the affair. OL/PMS is reviewing the articles to identify contractors involved and methods employed. An analysis has been performed of potential for such a problem in CIA.

6. CONIF - (AIUO)

CONIF has gone on line with GAS and OF has begun payment of contracts based on CONIF generated information. This interface has required several additional edits and has resulted in a quantum improvement in the accuracy and completeness of the CONIF data base.
